

Sprint Report 2 - CMPS 115

Product: Sead System

Team: SEADS

February 24th, 2015

Actions to stop doing:

- Being late to class because we hold our scrum meetings before class. So if we have to hold the meeting after class if this happens which makes us late to our following classes.
- Missing our Friday team meetings with our sponsor Ali. This one is hard to avoid because we have busy lives and sometimes don't have free Fridays.

What should we start doing:

- Keeping the scrum board more up-to-date. Sometimes we forget to update our tasks on Trello and people get confused about what people are working on. Having an updated scrum board also really helps with the end of sprint reviews too.
- More time meeting with the whole team. We often meet with each other, but in smaller groups of 2 or 3, never the whole group of 5. So the team can sometimes not be on the same page when we don't all meet together.

What should we keep doing:

- Our team works really well on Fridays after our meeting with Ali. This is because all 5 of us are there and we work on the project together as a whole. Lots of tasks usually get finished on Friday. If we could keep doing this on more days throughout the week, we'd get many things finished.
- Our team is good at working together. All of us get along fine, nobody is left out, and we're all comfortable with each other. This helps make it a friendly environment and a fun experience.

Work completed/Not Completed:

Completed:

- Connect raspberry pi to the database
- Working and professional Front-End graph
- SEAD plug emulator
- Connect front end to the API

Not Completed:

- ☐ Getting sample data with the Power Analyzer 1000
- ☐ Fixing the zoom issue when changing types of graphs

Work Completion Rate:

Total story points completed	42
Total days in Sprint 2	15
Total ideal work hours	50
User story points per day	2.8
Ideal work hours per day	3.33
